BRAND GUIDELINES

LOGO

02

The red and blue ServiTech "leaf" logo takes inspiration from the "Double Circle Coop" logo created by the Consumers Cooperative Association (CCA) in 1957, which later became Farmland Industries in 1967.

It has proven to be a well designed and durable logo that can be used across a wide variety of media from large signs to favicons in the leaf-only version.

COLOR PALETTE

03

The red and blue ServiTech "leaf" logo takes inspiration from the "Double Circle Coop" logo created by the Consumers Cooperative Association (CCA) in 1957.

The red upper part and blue lower part of the leaf are a specific red and blue to match the intentions of the coop logo designer evoking the intertwined nature of member-owned cooperatives.

The specific definitions and specifications for the two main colors are detailed here for all type of media and applications.

RGB – 227 47 61
Hex – E32F3D

TYPOGRAPHY

04

HELVETICA

The popular and timeless Grotesk-style typeface *Helvetica* has served us well through the years.

We use *Helvetica Neue* in a lot of our internal forms and documents due to its readability and ubiquity across operating systems and software.

The lowercase words "servi" and "tech" in center of the ServiTech leaf are set in more recent variant, *Helvetica New* (bold) with a horizontal spacing of 32% and centered.

Our most recent marketing materials are also set in Helvetica Now giving everything a light, modern look.

Helvetica Now Light
Helvetica Now Regular
Helvetica Now Bold
Helvetica Now Black

TYPOGRAPHY

05

MONTERRAT

The new ServiTech.com website as well as the new employee internet portal all use the open source sans serif the Montserrat typeface.

It is designed for use on digital devices to be readable at small point sizes with a variety of weights and styles to be flexible and attractive to employees and customers alike.

Montserrat is also used throughout this Brand Guideline document.

Montserrat Thin
Montserrat Extralight
Montserrat Light
Montserrat Regular
Montserrat Medium
Montserrat Semibold
Montserrat Bold
Montserrat ExtraBold
Montserrat Black

CONFERENCE SCHEDULE

Professional Development Conference

January 9-11, 2024
Kearney, Nebraska

Wednesday

5:30-6:30 PMPhotos and social
6:30-9:00 PMBanquet
7:30 PMKeynote speaker: Dan Mears (Kansas City Chiefs mascot "KC Wolf")
8:30 PMAnnual awards

Thursday

7:00 AMBreakfast
8:00-11:00 AMBreakout sessions

Time	Stateroom D	Stateroom E	Ballroom 1
8:00-8:50 AM	45 Years of Change in Crop Consulting Orvin Bontrager	Tips to be a Top Agronomist Travis Kinsison	Do I Really Need to Lime? Fred Vocasek
9:00-9:50 AM	45 Years of Change in Crop Consulting Orvin Bontrager	Chris Lohmeyer (Conservation Agronomist, ServiTech)	Hayden Geis (Agrian)
10:00-11:00 AM	In House	In House	In House

11:00-11:30 AMServiTech board Q&A session
11:30-NoonFinal wrap up

Scan this to view program updates and more.

Tuesday

Noon-5:00 PMCheck in
1:00-5:00 PMTechnical questions and answer session (Steve Bryan, Matt Wildman, and APS members answer questions about mapping, technology, etc.)
5:00-10:00 PMSocial Night at the Big Apple: food, bowling, pool, bar, food, prizes, etc.
The food for the evening will be catered by "The Brisket Place". There will be BBQ brisket and pulled pork along with excellent side dishes.
The Big Apple is only a few blocks away from the hotel but there will be a bus to shuttle folks back and forth starting at 5. We will share the facility with a bowling league but the sports bar and QO CARTS will be all ours.

Wednesday

7:00 AMBreakfast
8:00-8:10 AMWelcome from Ryan Hassebrook, CEO
8:10-9:00 AMCrop Service: Building on a Stable Foundation — Ryan Hassebrook
9:05-10:35 AMUpdate on Pesticide and Fertilizer Future — Gail Stratman (FMC)
10:35-10:50 AMBreak
10:50-11:50 AMConservation Ag. Carbon Markets, Etc. — Amy Cole (Farm Journal)
11:50-12:10 PMYears-of-service recognition, beginning of the lunch period
Noon-1:00 PMLunch
1:00-5:00 PMBreakout sessions

Time	Stateroom D	Stateroom E	Ballroom 1
1:00-1:50 PM	Controlling Rootworms with Nematodes Dr. Elston Shields	Carbon Sampling and Associated Info Prof. Peter Tomlinson (KSU)	Target Update Tamra Jackson Ziems (UNL)

4:00-5:00 PM	Correct Nozzling for Various herbicides Brady Kappler (BASF)	Pigweed Phenotyping TJ Sims (Syngenta)	401(k) Information for Older Employees 40 and Over Dustin Kuhn (Merrill Lynch)

Sponsors

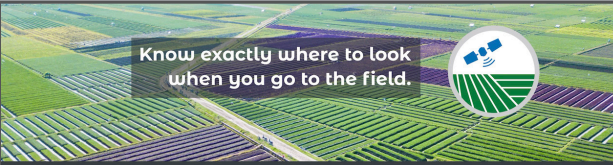

Water is the fuel that powers your crop. As irrigation costs continue to rise, you should have a fuel gauge.

Soil Moisture Management

Sensor driven irrigation management has shown potential ROI of up to \$50 per acre in row crops according to University of Nebraska research—with even more significant ROI potential in high value crops such as vegetables.

- ServiTech soil moisture management is the gauge for your irrigation and soil moisture decisions, based on real time field data.
- Customizable crop stress alerts to your phone, tablet, or computer
- Includes field imagery and soil texture analysis for accurate water holding capacity of your field

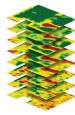

Know exactly where to look when you go to the field.

Field Imagery

What does the crop look like in the far corner of the field? Know exactly where the trouble spots are while there's still time to fix them.

- Know week-to-week crop vigor changes
- Identify recurring problem areas from year-to-year with historical imagery
- Predict yield variations in-season
- Identify dry and immature areas of the field to aid in harvest

Track the weather in your fields, not the nearest airport.

Weather Station

Receive stress alerts, wind advisories, and monitor rainfall. Know the exact spraying conditions before heading to the field.

- Know the exact spraying conditions before heading to the field
- Receive crop stress alerts based on in-field conditions
- Know about sudden weather changes instantly
- Keep a backup record of all local weather conditions for environmental and other reporting requirements

It rained in your area last night. How much did your field get?

Rainfall Measurement

Monitor rainfall and soil moisture together to know the amount and benefits of last night's rain.

- Bridge tells you "when", "how much", and "how fast" the rainfall came, not just the amount since the last time you remembered to dump the gauge
- How much did it rain last night? How much did it rain per hour? Did it rain so hard, it ran off into the ditch and didn't infiltrate? Did you lose nitrogen with that hard rain? ServiTech Bridge helps you answer those questions
