

Angus Cattle Catalog

Dan Morgan
Graphic Designer

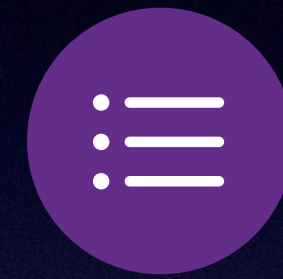

Project Overview

My role:

I was the co-owner and manager of a family-owned registered Angus farm early in my career.

Responsibilities:

I produced a 12 page sale catalog yearly with complex layouts and photos. It included a glossy cover with a spot color.

Project Overview

Project Description :

Annually produced 12 page catalog with complex layout of text, illustrations, and photographs.

Purpose:

Market cattle for sale at auction.

Role & Responsibilities:

I was responsible for the photography, design, layout, and pre-print production

Constraints:

Time constraint of 45 days from when the cattle were chosen for the sale and the catalog had to be at the printer for a late March sale taking into account printing and mailing timelines.

Users and Challenges

Primary Users :

- Prospects and customers
- Internal use for planning and promotion
- External use by auctioneer and print publication marketers

Goals:

- Produce a yearly catalog like clockwork with a hundred different variables and known unknowns.

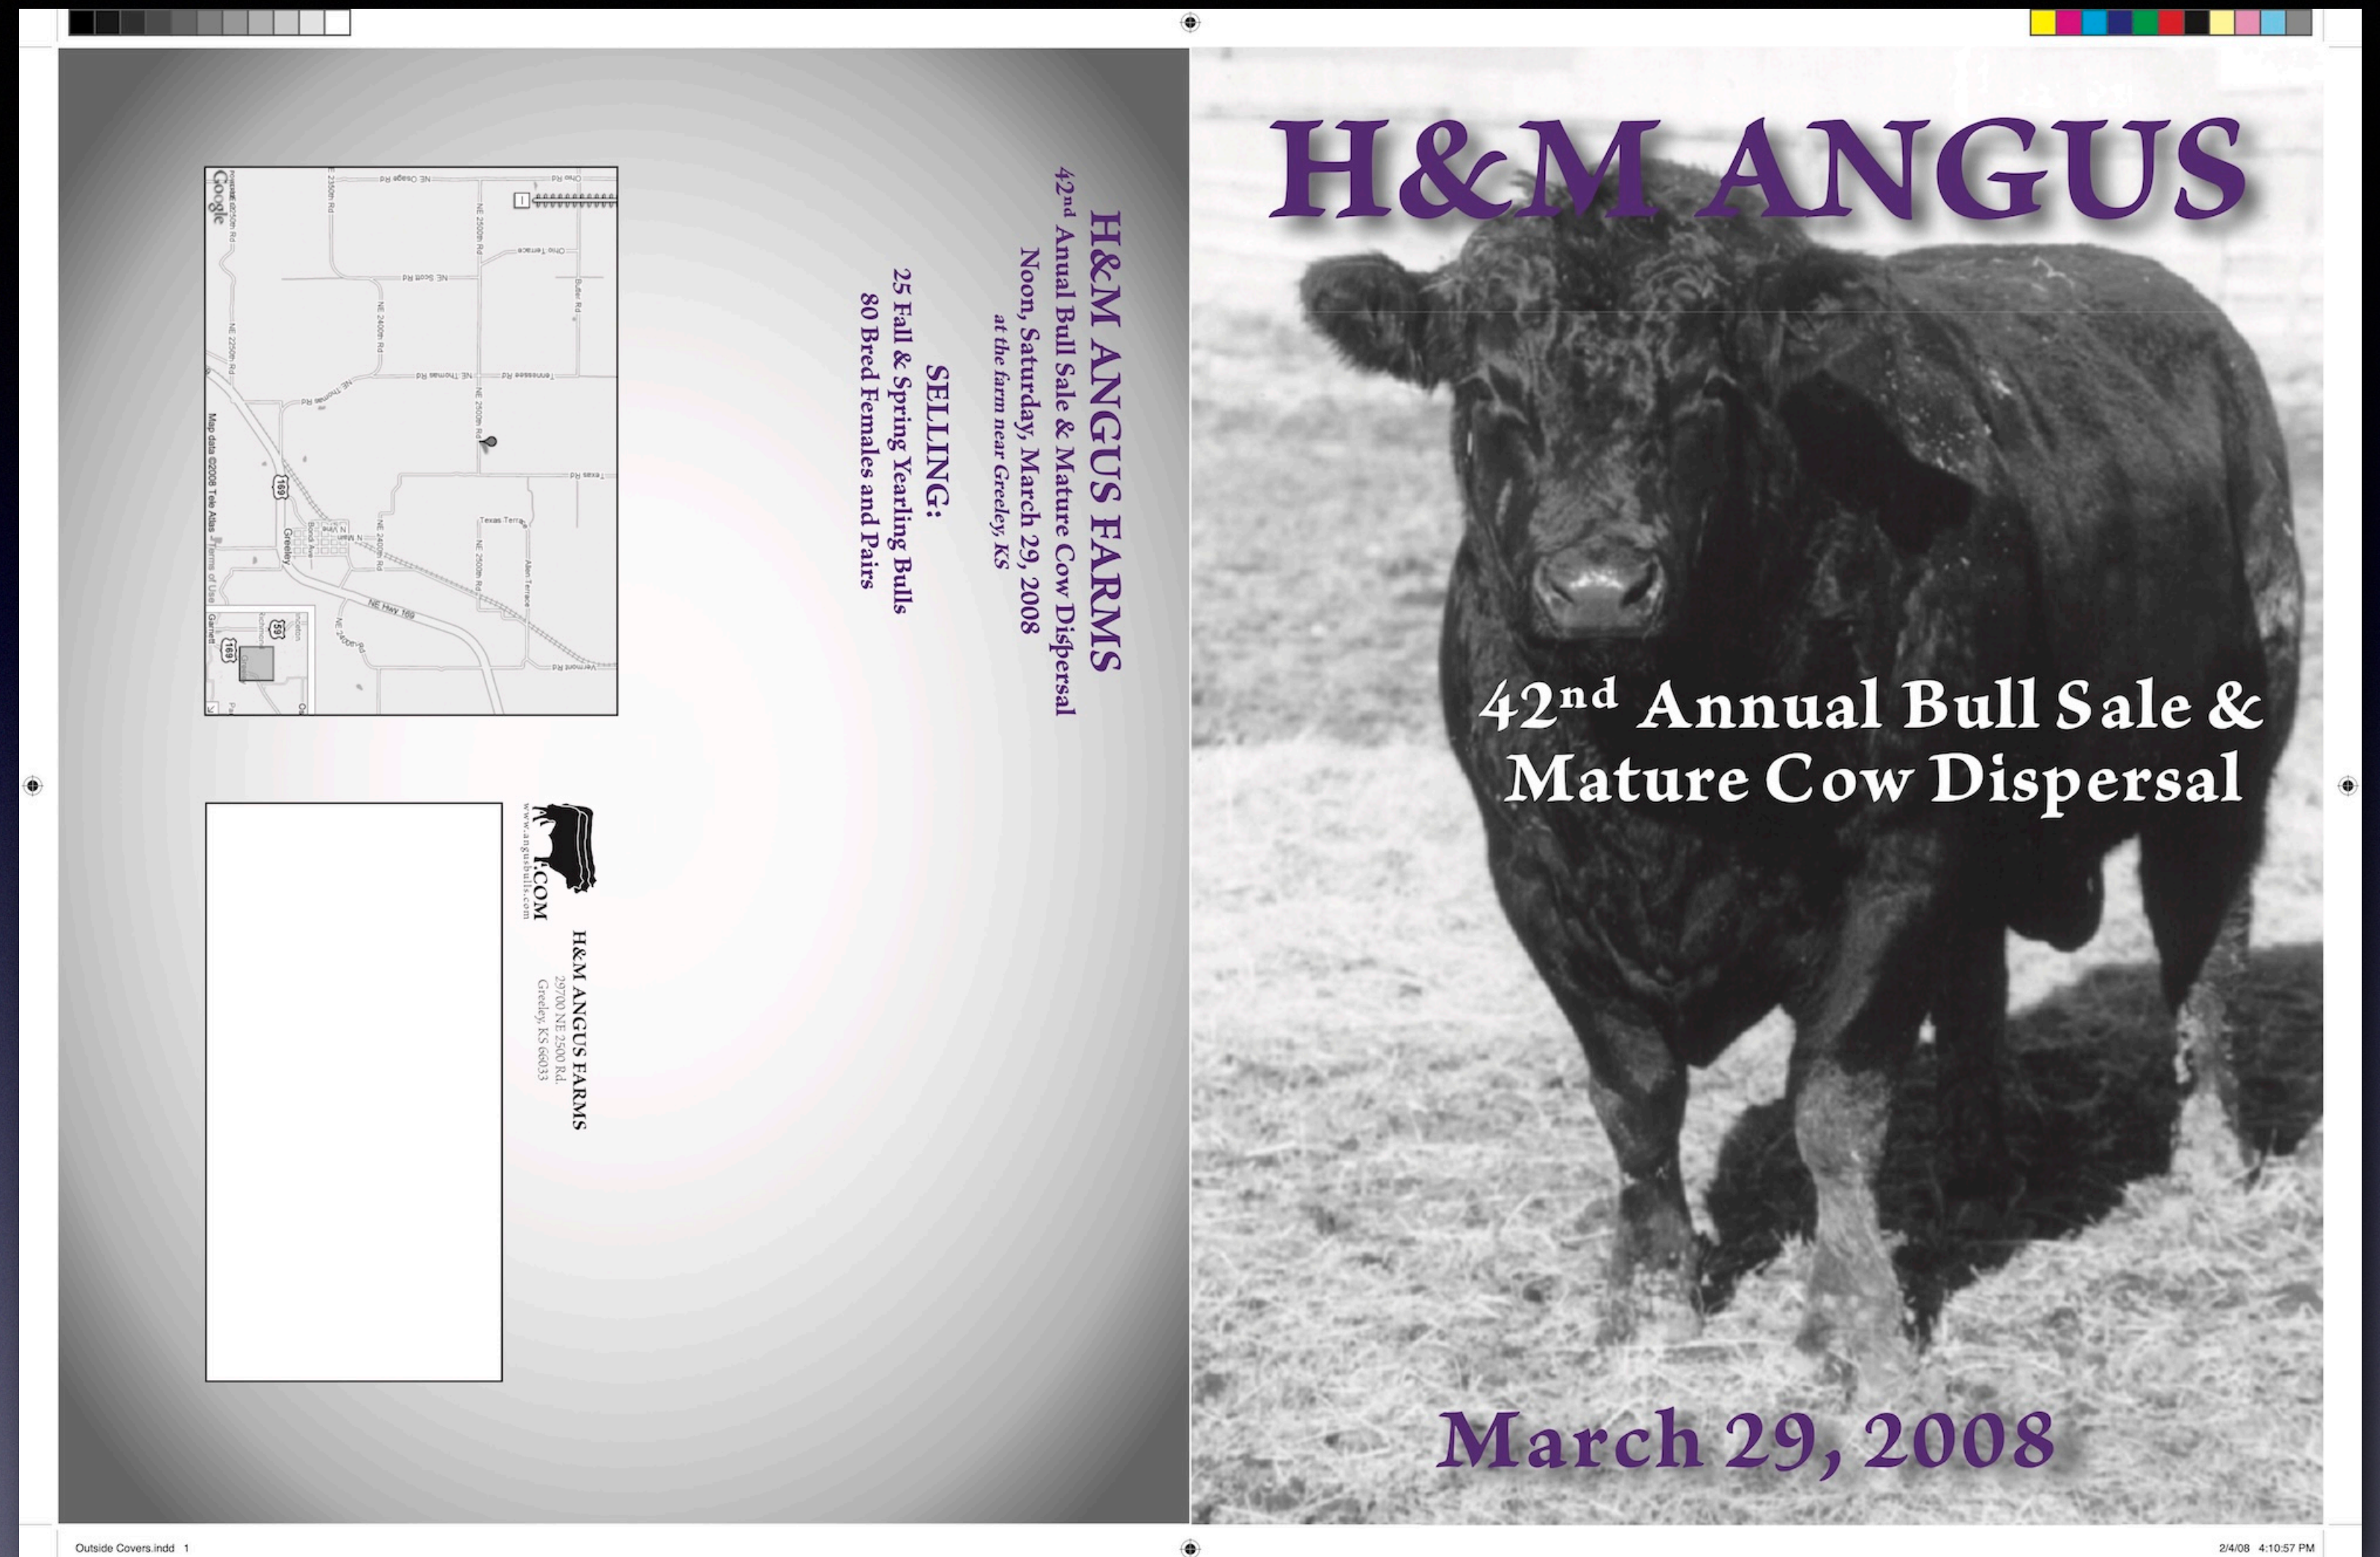

Challenges:

It was always a challenge to take photos of bulls and cows in January and February to have them ready for a late February print deadline.

Process

The front cover was designed in Adobe Illustrator with the artwork imported into Adobe Indesign for final layout.

The cover was heavy stock with a glossy finish using one spot color for cost savings.

Front and back cover with one spot color.

Process

The interior pages were laid out in Adobe Indesign for printing two per sheet on each side, then saddle stapled with the cover.

Interior pages: spread 6 of 12 - pages 6 and 19.

Results and Outcomes

I took over the design and pre-print production of our annual catalog to have greater control over the final design choices as well as reduce the errors and omissions.

I was able to allow myself more time to do the actual content production because I controlled the process up to the point it went to print.

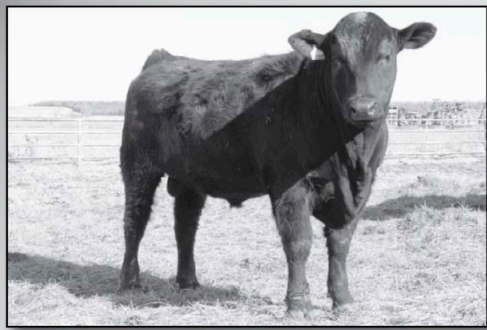

Finally, by leveraging my knowledge as a graphic designer and as early web adopter we were one of the first cattle ranches with an internet presence to showcase our cattle.
